XIO AWARDED NAVY AIT SUPPORT SUBCONTRACT

Represents an Expansion of Work with the Department of the Navy

MCLEAN, VIRGINIA – XIO Strategies, Inc., a leading supply chain management and Automatic Identification Technology (AIT) consulting firm in the Washington, DC area, was recently awarded a subcontract by Science Applications International Corporation [NYSE: SAI], the prime contractor, in support of an AIT implementation program by the Department of the Navy. Under the terms of this subcontract, XIO will provide business process, supply chain, and change management services to support the Navy concept of operations (CONOPS) development in emergent AIT technologies that include RFID and IUID/UID.

Building on nearly four years of experience supporting the Office of the Secretary of Defense (OSD) in the Supply Chain Integration Office for RFID strategy and policy, as well as the IUID Policy Development and Integration Office, XIO has recently been serving as a subject matter expert to the Navy AIT Office in its preliminary efforts to begin developing a RFID Implementation CONOPS.

“We’re very pleased to continue our work with SAIC and the Department of the Navy,” said Mary Ann Wagner, president and founder of XIO Strategies, Inc. “We take great pride in facilitating the adoption of AIT within the federal government.”

About XIO Strategies, Inc.: XIO, one of the region’s fastest-growing companies, has proven expertise in addressing the critical challenges of business and organizational transformation. By leveraging a collaborative culture and unique expertise in supply chain management, Automatic Identification Technology, program and project management, as well as strategic change management consulting, XIO helps elite clients make technology work.
